Mutual fund investing involves risk. Principal loss is possible. The Osterweis Fund may invest in medium and smaller sized companies, which involve additional risks such as limited liquidity and greater volatility. The Fund may invest in foreign and emerging market securities, which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks may increase for emerging markets. The Fund may invest in Master Limited Partnerships, which involve risk related to energy prices, demand and changes in tax code. The Fund may invest in debt securities that are un-rated or rated below investment grade. Lower-rated securities may present an increased possibility of default, price volatility or illiquidity compared to higher-rated securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities.

Osterweis Capital Management is the adviser to the Osterweis Funds, which are distributed by Quasar Distributors, LLC. [OSTE-20230614-0905]
