Rates of return for periods greater than one year are annualized. **Performance data quoted represent past performance; past performance does not guarantee future results.** The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be higher or lower than the performance quoted. Performance data current to the most recent month end may be obtained by calling shareholder services toll free at (866) 236-0050. Investment performance reflects periods during which fee waivers were in effect. In the absence of such waivers, total return would have been reduced.

5 Year Risk and Return

The 60/40 blend is composed of 60% Standard & Poor's 500 Index (S&P) and 40% Bloomberg U.S. Aggregate Bond Index (Agg) and assumes monthly rebalancing. The S&P is an unmanaged index that is widely regarded as the standard for measuring large-cap U.S. stock market performance. The Agg is an unmanaged index that is widely regarded as a standard for measuring U.S. investment grade bond market performance. These indices do not incur expenses and are not available for investment. These indices include reinvestment of dividends and/or interest income.

The Osterweis Funds are available by prospectus only. The Funds' investment objectives, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectuses contain this and other important information about the Funds. You may obtain a summary or statutory prospectus by calling toll free at (866) 236-0050, or by visiting www.osterweis.com/statpro. Please read the prospectus carefully before investing to ensure the Fund is appropriate for your goals and risk tolerance. **Mutual fund investing involves risk. Principal loss is possible.** The Osterweis Growth & Income Fund may invest in small- and mid-capitalization companies, which tend to have limited liquidity and greater price volatility than large-capitalization companies. The Fund may invest in foreign and emerging market securities, which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks may increase for emerging markets. The Fund may invest in Master Limited Partnerships, which involve risk related to energy prices, demand and changes in tax code. The Fund may invest in debt securities that are un-rated or rated below investment grade. Lower-rated securities may present an increased possibility of default, price volatility or illiquidity compared to higher-rated securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. From time to time, the Fund may have concentrated positions in one or more sectors subjecting the Fund to sector emphasis risk. Investments in preferred securities typically have an inverse relationship with changes in the prevailing interest rate. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments.

Past performance does not guarantee future results. While the fund is no-load, management fees and other expenses still apply. Please refer to the prospectus for more information. Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security.

Investment and insurance products are not FDIC or any other government agency insured, are not bank guaranteed, and may lose value.
